

# SURG TECHS KNOW SETUP

A good surgical technologist is a magician – a mind reader if you will. They anticipate the surgeon's needs before the surgeon does – knowing exactly what is needed when it is needed.

A good surgical technologist doesn't only play a critical part on an OR team, they ARE the critical part on the OR team. Having a good surgical technologist in surgery saves lives. That's why every surgical team needs a trained and certified surgical technologist to ensure the highest level of patient care because it's the patient's life that depends on it.

Join AST on our mission to promote the role of the surgical technologist. Find more resources and tools on how you can help promote the profession by scanning the QR code. #AegerPrimo #EssentialSurgicalTechnologist
