About

The Ambassador Program was developed to support AST members who are passionate about advocacy, professional growth, and advancing awareness of the surgical technology profession.

Through mentorship, training, collaboration, and outreach opportunities coordinated by the AST Advocacy Committee, ambassadors will help strengthen relationships within healthcare and educate the public about the critical role surgical technologists play in patient safety and surgical care.

AST
Ambassador
Program

Who Should Apply?

AST is seeking members who are:

- Passionate about advancing the profession
- Strong communicators and relationship builders
- Interested in advocacy, leadership, and outreach
- Active within their workplace or professional community
- Committed to professionalism and ethical representation of AST

Applicants from diverse professional backgrounds and experience levels are encouraged to apply.

Application Process

Interested candidates will complete an application and submit supporting materials for review by the AST Advocacy Committee.

Application Requirements

- Completed Ambassador Application
- Professional CV or resume
- Short professional biography/profile
- Letters of recommendation
- Brief video scenario submission

Selected participants will receive onboarding information, training details, and expectations following the review period.

The Ambassador Program aims to:

→ Develop

confident and informed advocates for the surgical technology profession

→ Increase

public and professional awareness of surgical technologists and patient safety initiatives

→ Build

relationships with healthcare leaders, educators, legislators, and community organizations

→ Provide

members with leadership development, advocacy education, and communication training

→ Support

AST initiatives through outreach, engagement, and professional representation
