

SCHOOL OF SURGICAL TECHNOLOGY

POLICY: STUDENT CLINICAL EXPERIENCE RECORDS

Students are responsible for maintaining clinical experience records. Clinical experience records document students' case experiences in the clinical area. Copies of all experience records will be given to each student upon graduation as documentation of their clinical education. **Completion of student clinical experience records is mandatory.**

Copies of all clinical experience records will be maintained in the student master file.

The Program Coordinator and/or clinical instructors will collect the experience records periodically to verify clinical progress.

Any student found falsifying information on the clinical experience records will be terminated from the program.
